### RSK VISION

Forerunner in Complete Steel-based Solutions.

### RSK MISSION

At RSK, we deliver complete, steel-based solutions through committed partnerships that enable you to achieve your goals.

## WHY CHOOSE **REGAN?**

### CONVENIENCE

Regan takes pride in customizing your needs. Aside from offering superior service at competitive prices and producing time-tested steel products, we offer absolute convenience through being a one-stop shop for steel products that ensures an unmatched and time-definite delivery service all over the archipelago.

### VARIETY AND CHOICES

Driven by our expertise in sourcing and logistics, we offer a wide range of products which includes plates, sections, pipes, tubings, bars, rods, and other novel structural materials. Our ability to seek a diversity of options over time for our clients has established Regan as one of the most respected steel suppliers in the Philippines -- providing services and products made of superior materials and outstanding customer service.

### INNOVATIVE SOLUTIONS

As we move forward towards innovation, our company is constantly exploring in expanding its wide and varied selection of products, services, and systems that adhere to the highest standards in order to provide solutions for your different and changing needs.

### PARTNERSHIPS

Regan firmly believes that every part of our business boils down to people. We develop a culture of service through emphasizing the undeniable value of serving the RSK family: our people, clients, and suppliers. We place an ardent focus in improving the ways in which our partners are supported and appreciated in order to cultivate a culture that is focused on creating a positive difference on the lives of the people whom we are tangled with a complete, earnest commitment.

“Whatever you do, do it all for the glory of God”

# REGAN SEAMLESS PIPES

**STANDARD  
API 5L / ASTM A53 / ASTM A106  
GRADE B ( SCHED. 40,80 & 160 )**

Seamless pipe, as the name suggests, is a pipe without a seam or a weld-joint. Seamless steel pipe is made from a solid round steel 'billet' which is heated and pushed or pulled over a form until the steel is shaped into a hollow pipe. The hollow pipe is then extruded through a die and mandrel combination to reduce the outside diameter and to expand the inside diameter.

Seamless pipe has higher working pressure and offers superior corrosion resistance because it has little potential for impurities, defects and differences in malleability.

## COMPOSITIONS AND PROPERTIES

As prescribed by ASTM standards, the chemical and tensile requirements for seamless pipes are as follows:

### MECHANICAL PROPERTIES

Yield Point ≥ 240 MPa ( 35 000 psi )  
Tensile Point ≥ 415 MPa ( 60 000 psi )  
Elongation 17%- 30%

### DIMENSION TOLERANCE

Weight : + 10%, -3.5%  
Outside Diameter  
40mm and below : ± 0.40mm  
50mm and below : ± 1%  
Wall Thickness : ± 12.50%

### APPLICATION

- Exhaust Tubing
- Petroleum Line
- Oil Refinery Equipment
- Residential
- Office water lines
- Hydraulic Pipe Line
- Steam Boiler
- Energy
- Chemical
- High Temperature Fluid

### CHEMICAL REQUIREMENTS

C	Si	Mn	S	P	Cr	Ni	Cu
0.3	0.10	0.29 - 1.06	0.035	0.035	0.40	0.40	0.40

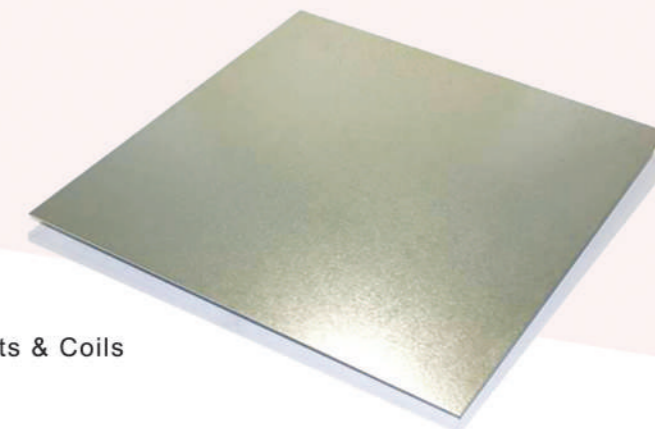

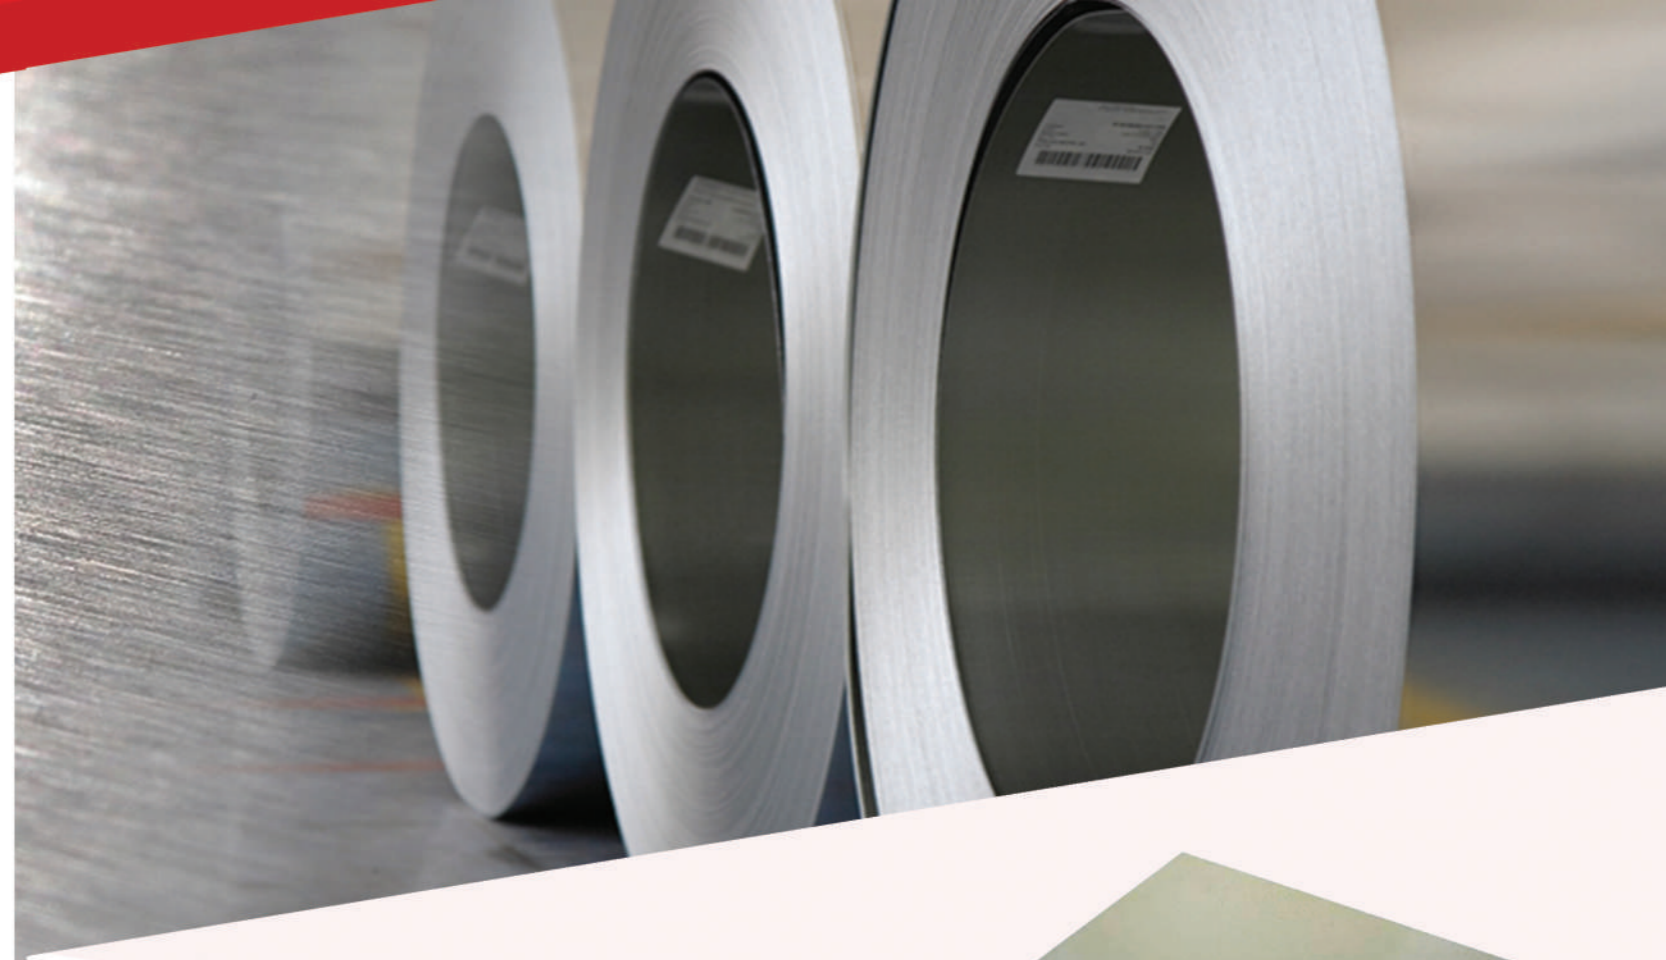

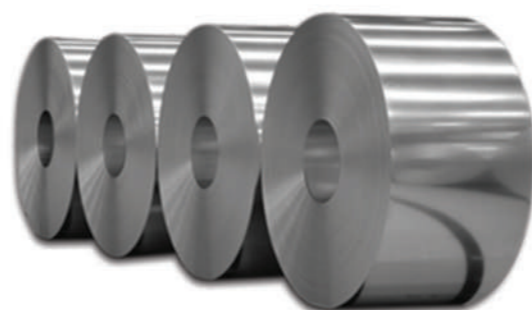

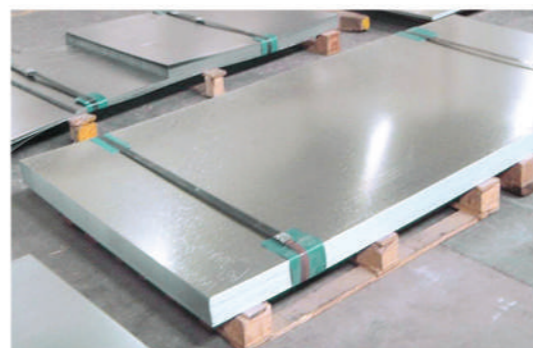

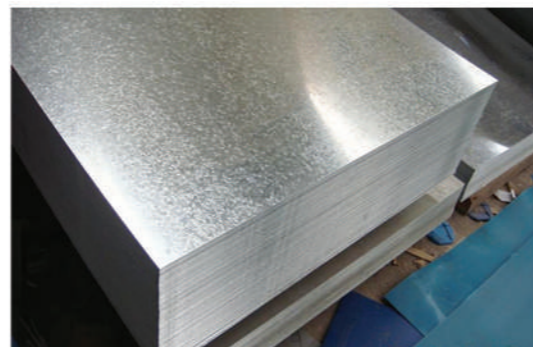

# GALVANIZED IRON SHEET & COILS

REGAN galvanized sheet or coil is a carbon steel sheet coated with zinc on both sides.

Continuous hot dipping and electro-galvanizing are the two processes used to produce galvanized sheets and coils. Generally speaking, the hot dip process consists of passing the steel through a bath of molten zinc.

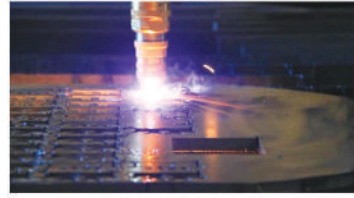

In comparison, the electro-galvanizing process consists of the application of zinc by electrolytic disposition wherein the result is a layer of zinc tightly adhering to the base metal through an iron-zinc bonding layer.

## SPECIFICATIONS:

<b>PRODUCT :</b>	Hot-dip Zinc-Coated Steel Sheets & Coils
<b>GRADE :</b>	Commercial Quality (QM)
<b>STANDARDS :</b>	PNS 1990:2004 JIS G 3302 ASTM A 653 ISO 3575
<b>SURFACE TREATMENT/FINISH :</b>	Chromated, minimized to Regular Spangle
<b>THICKNESS :</b>	0.4mm - 2.5mm
<b>WIDTH :</b>	915mm & 1220mm
<b>TENSILE STRENGTH :</b>	275Mpa, min (40,000psi)
<b>YIELD STRENGTH :</b>	140Mpa, min (20,360psi)
<b>SPECIFIABLE COATING :</b>	Z100 - Z275 (100-275 g/m <sup>2</sup> ) <i>(upon special request)</i>
<b>COIL ID :</b>	508mm
<b>FORMABILITY :</b>	Lockforming Quality
<b>APPLICATION :</b>	A/C Ducting, Vehicle body, Water tanks etc.
